SANTA CRUZ COUNTY OUTDOOR SCIENCE SCHOOL

PARENT/GUARDIAN INFORMATION

VV elcome to Santa Cruz County Outdoor Science School, a school without walls or desks,

sponsored by the Santa Cruz County Office of Education. The Outdoor Science School experience is available to fifth and/or sixth grade students accompanied by their classroom teacher who spend four or five days living on site.

Classes are conducted in the forest, at the edge of the creek, in the chaparral, and in the meadow. The most useful tools for learning are readily available: the students' five senses. The subject area most emphasized in this hands-on learning experience is the science of ecology, the relationship between living things and their environment. From an understanding of basic ecological concepts, we hope that a deeper connection and sense of responsibility for the environment will result.

The Curriculum

The curriculum of the outdoor science school program is aligned with the *Next Generation Science Standards*. We work with classroom teachers before they reach outdoor science school, and strive to aid in student's learning before and after outdoor science school through our curriculum handbook. We focus on authentic inquiry as students explore, interact with and discuss the natural wonders of the redwood forest ecosystem.

The Social Aspect

A second and equally important outcome of the program is the social aspect. The 3 Rs are emphasized; respect, responsibility, and reliability, and are reinforced through the sharing of chores and small group living. Shared cabin living encourages making new friends and working through problems as they occur. Friendships that are made during this week may last a lifetime. The students are encouraged to understand the value of a positive attitude and of being willing to adapt to new settings and situations.

How is the Outdoor Science School Organized?

The Santa Cruz County Office of Education is responsible for the administration of the Outdoor Science School. Koinonia Conference Center is the site where the program takes place; Koinonia is contracted to supply the site facilities, maintenance, kitchen crew, and the ropes course staff. The instructional staff from the County Office of Education consists of outdoor education specialists (we call them naturalists) who work closely with the students. The instructional staff works under the leadership of the director, program coordinator and program assistant of the outdoor science school and the credentialed teachers to provide a positive living and learning experience. Another value of the program is the opportunity for supervised leadership training and community service offered to high school students who serve as cabin leaders through our service learning program.

Staff and Cabin Leaders at Science School

The staff at Outdoor Science School are carefully interviewed, referenced and background-checked. Each naturalist is a college graduate and certified in wilderness first aid and CPR. They are safety-oriented, positive, enthusiastic, and they know how to make learning fun for your child. Cabin leaders are trained high school volunteers. They work under the supervision of the Outdoor Science School staff. The cabin leader selection process requires good academic standing and includes an application, a letter of recommendation, and signatures from teachers, counselor and principal indicating readiness for leadership. An extended group interview takes place during leadership training the evening before the 5th/6th grade students arrive. The cabin leader training includes (but is not limited to) positive discipline, abuse prevention and risk management.

Food at Science School

While involved in our program, your child will be eating nutritional and tasty food. Children serve themselves during family style meals in our spacious dining room and are encouraged to eat as much as they would like. Our cooks are experienced in preparing and serving balanced meals to help make sure your child's needs are met. The cooks are also able to accommodate some special diets with advance notice. If your child has special dietary needs, please read and fill out the attached SPECIAL DIETARY NEEDS form. You may need to contact the Outdoor Science School ahead of time to discuss your child's dietary accommodations.

Accommodations at the Science School

Students stay in carpeted and heated cabins that accommodate between 10 and 14 individuals each. The beds are furnished with plastic covered mattresses. Bathrooms are located in each cabin with private shower facilities. Students are required to clean their living quarters each day. One or more cabin leaders will stay in the cabin with the students. Classroom teachers stay in separate cabins nearby.

Student Safety

The Outdoor Science School has clear policies and practiced procedures that address students' physical and emotional safety. Staff members participate in extensive training which includes (but is not limited to) Emergency Procedures, Positive Discipline, Mandatory Reporting and Abuse Prevention. Our Cabin Privacy Rules are shared with students on arrival day and posted in each cabin, visible for all, to ensure that everyone has a clear understanding of appropriate rules and boundaries in a shared living environment. Our twice-daily, routine "Quick-Writes" activity allows every student the opportunity to communicate any concerns in writing and confidentially to their naturalist and/or classroom teacher each morning and evening. If you have questions or would like further information about the details of our policies and procedures, please call the director at 831-466-5715.

Poison Oak + Ticks

Poison oak exists near our hiking trails. As long as students follow our important school rule of "stay on trail," they are very unlikely to encounter poison oak. Naturalists survey all areas before allowing students to go off trail for exploration. If your child is highly allergic to poison oak, please indicate so on their registration form. We have Tecnu wash available in the health office for students who have accidentally come into contact with poison oak. **Ticks** also exist in the redwood forest. On rare occasions, they will "hitchhike" on a student. For this reason, we give self-tick-check instructions to every student on arrival day and encourage them to do self-tick checks in the bathroom each night and morning. If a student discovers a tick, the health supervisor will remove it, save it and send it home with the student. We will also notify parents.

Health Care at the Science School

A Health Supervisor is in residence 24 hours a day while your child is attending science school. If a child becomes too ill to participate in activities, parents will be called to pick up their child. If an emergency arises or your child is hurt while at the outdoor school, you will be notified immediately. Emergency Medical care is just minutes down the road at the local fire station. If parents cannot be reached, medical treatment will be given under the authorization parents sign as part of the registration procedure. Please fill out all health forms carefully and completely in ink.

Medications

In order for your child to receive any medications at the Outdoor Science School, you must complete and sign the Authorization to Administer Medication form in this packet. If your child takes regular medications (prescription and/or OTC not listed on the form), your child's physician must also complete and sign the form. ALL medication sent with your child must be in the ORIGINAL CONTAINER (including over-the-counter). Medication in pill-boxes cannot be administered. Prescription containers must have the original prescription label that is legible and includes the following information:

- 1. STUDENT'S NAME
- 2. PHYSICIAN'S NAME
- 3. NAME OF MEDICATION
- 4. DOSAGE (how much and when)

Information and directions on the prescription label must match the written physician's orders on the Authorization to Administer Medication form.

Homesickness

While many students may feel very confident away from home, some may experience separation anxiety and display signs of homesickness. The outdoor science school staff members are caring and respectful and are trained to work with students struggling with homesickness. Staff members work together with the student's teacher and cabin leader to provide the nurturing, support and counseling that is needed. If a student is experiencing homesickness, a phone call home is <u>not</u> our first approach. Students are more successful when they are able to stay focused on participating in the activities rather than focusing on home. In more severe cases, the administrative staff may call the student's parents to inform them of their child's homesickness, outline steps taken to support their child and answer any questions the parents may have. It is our policy to keep parents informed if their child is experiencing severe homesickness. If you anticipate that your child will experience severe homesickness, setting up a tour (by calling the number listed below) to visit the campus before their attendance week is a great way to alleviate anxiety.

The First Day's Lunch

PLEASE PROVIDE YOUR CHILD WITH A BEVERAGE AND A BAG LUNCH TO BE EATEN DURING THE FIRST DAY OF OUTDOOR SCIENCE SCHOOL (No peanuts or peanut products, please). No other snacks or meals should be sent with your child unless there is a medical reason for doing so. We ask that no food be in the child's cabin because of potential insect and rodent pest problems.

Transportation

School sites will arrange the transport of students each way. Check with your school site to find out what time your child needs to be at school the first day of science school, and when your child will be arriving on the last day of science school.

Letter from Home

Cheerful letters from home, which are "general" in nature (no bad news please), are always appreciated by the students. Please mail your letters early (the Saturday before the program week is best) in order to ensure their arrival by Tuesday or Wednesday. Please <u>do not</u> send packages, food, gum or candy. Mail is delivered to the students each morning at breakfast. Mail that arrives Friday afternoon after your child has departed, or later, will be stamped with "return to sender" and sent back to you.

ADDRESS MAIL AS FOLLOWS:

Please direct phone calls during the program week to our Koinonia site office at (831) 722-8222. If you cannot reach anyone at that phone number please try the Santa Cruz County Office of Education at (831) 466-5715.

Outdoor School T-Shirts and Sweatshirts

Please remember to check the Outdoor Science School store order form for items your child may like to buy. All items should be pre-ordered. Look for the attached order form. Please do not send cash with your child as they will not have the opportunity to buy anything while on site. Contact your child's teacher for further instructions.

All checks that are written to purchase store items should be made payable to Santa Cruz County Office of Education

A Typical Day at Outdoor Science School

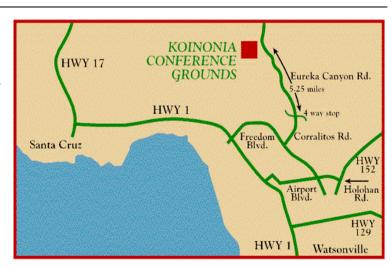

7 AM----Wake up/Shower/clean cabin 4:30-----Song/rap/poem/cheer practice 5 PM-----Cabin Time 7:50----Flag ceremony/set tables 5:20-----Flag ceremony 8 AM----Breakfast 5:30-----Dinner 9:30----Field Study 6:30-----Class meeting 11:45---Set tables 7:30-----Evening Activity Noon----Lunch 12:45---Cabin rest time 9:00-----Return to cabin 9:20-----Lights Out and quiet 1:15 PM---Field Study or Ropes Course

For More Information...

Check out our website at https://osp.santacruzcoe.org and/or our online parent presentation at https://youtu.be/m9XDEwZyeoE for English and: https://youtu.be/kTUhE35zGDc for Spanish.

Site Phone at Koinonia #: 831-722-8222 Santa Cruz County Office of Education #: 831-466-5715

Take Highway 17 south to Highway 1. Proceed south to Freedom Blvd. Exit and proceed left over the freeway. Continue approximately 5 miles to Corralitos Road. Turn left on Corralitos Road and continue approximately 1.5 miles to a four way stop sign. Check the odometer on your car, Koinonia is straight ahead almost 5.2 miles up Eureka Canyon Road. We're located on the left side of the road up a steep driveway. There is a sign at the entrance

WHAT TO BRING LIST FOR OUTDOOR SCIENCESCHOOL

Items with an asterisk* are suggested but not required

IMPORTANT INFORMATION

The Outdoor Science School kitchen is a peanut and tree-nut free facility, with the exception of desserts served after dinner each evening, which do not contain nuts, but may have been processed in a plant that also processes tree nuts. If your child is allergic to peanuts or tree nuts, they will receive Oreo cookies for dessert each night. The kitchen is prepared to provide Gluten free, Dairy free, Vegetarian and Vegan meals without prior notice. If your child is allergic to EGG, SOY or CORN, or you have any other dietary concerns, please call our office (831-722-8222) two weeks before your child is scheduled to attend to discuss menu substitution options. You may be asked to send up pre-made substitution meals if the dietary restrictions are beyond the scope of the Outdoor Science School kitchen.

Informed Consent for COVID-19 Diagnostic Testing

I voluntarily consent and authorize the Santa Cruz County Outdoor Science School to conduct collection, testing and analysis for the purposes of COVID-19 diagnostic tests on my child named below.

I acknowledge and understand that the COVID-19 diagnostic test used at the Outdoor Science School is a rapid home antigen test and will require the collection of an appropriate sample through an anterior nasal swab.

I assume complete and full responsibility to take appropriate action with regards to test results. Should I have questions or concerns regarding student test results or physical condition, I shall promptly seek advice and treatment from an appropriate medical provider.

I understand there will be no cost or out of pocket fee, to the student, parent/guardian or medical insurance for this rapid home antigen test.

I understand that signing this form authorizes the Santa Cruz County Outdoor Science School to test my child named below if they present with symptoms consistent with COVID-19.

BEHAVIOR EXPECTATIONS

RULES AND GUIDELINES FOR SANTA CRUZ OUTDOOR SCIENCE SCHOOL

Behavior guidelines are necessary at the outdoor school as they are everywhere else. These are simple, common sense rules that are not meant to restrict students from having an experience that is fun, but to insure that everyone is safe and enjoying the Outdoor Science School equally.

The **Outdoor School "3 R's"** will help you remember what is expected:

- * Be **RESPECTFUL**. Show respect for yourself and others, their feelings, their rights, their bodies (treat others as you would like to be treated) and their property (do not touch anything without the owner's permission).
- * Be **RESPONSIBLE**. Think before you act and make the appropriate choices that are in the best interest of everyone at the Outdoor Science School. You will be held accountable for the choices you make and for the consequences of those actions. Your parents, your classroom teacher, your school, and especially your classmates will be depending on you to behave in a way that will not be disruptive or take away from their experience. Inappropriate behavior wastes everyone else's time.
- * Be **RELIABLE.** Show your cabin leader, naturalists and teachers that you can be counted on to follow the rules. Take care of your own personal space in your cabin. Show your cabin leader, naturalists, teachers and friends that they can rely on you to help out.

The staff at the Outdoor Science School will be relying on each student to be responsible for knowing, understanding, and following the guidelines listed below!

CABINS: Students are expected....

- 1. not to enter other cabins (failing to follow this rule could result in immediate suspension).
- 2. to be in bed and quiet by lights out (usually 9:20 P.M.) except for emergencies.
- 3. to remain in bed until 7:00 A.M. when the Cabin Leader asks you to get up.
- **4.** to stay with your cabin group at all times.
- 5. to refrain from pillow fights, wrestling, roughhousing or pranks of any kind.
- 6. not to have any food of any kind in cabins (in order to avoid attracting rodents and insects).
- 7. to follow the directions of, and cooperate with the Cabin Leader.

DINING ROOM: Students are expected...

- 1. to talk quietly at the table.
- **2.** to stay seated (only the Hopper has reason to leave the table during meals).
- 3. to understand that playing with or throwing food is inappropriate.
- **4.** to listen quietly when it is time for announcements and instructions.

TRAIL AND GROUNDS: Students are expected ...

- $\boldsymbol{1.}\,$ to stay on the trail and walk \boldsymbol{behind} the Naturalist or Cabin Leader.
- 2. to wear long pants and close-toed shoes on trail.
- 3. to refrain from throwing objects, pushing, or carrying walking sticks.
- 4. to respect all plants and animals and not to remove or hurt them in any way.
- 5. to listen quietly at all times when a Teacher, Naturalist, or Cabin Leader is speaking.

IN GENERAL: Students are expected...

- 1. to use appropriate language.
- 2. to avoid statements that could be thought of as put-downs to or about others.
- **3.** to cooperate with staff and other students.
- **4.** to refrain from doing anything that could cause harm to self or others or damage to Outdoor School buildings and grounds

I have read the three R's and the guidelines. I understand them, and I am willing to follow them. I understand that my failure to follow them could result in my parents being called and could cause suspension from the Outdoor School.
